

Green Polymer Chemistry: Biobased Materials and Biocatalysis (Hardback)

Filesize: 8.4 MB

Reviews

A must buy book if you need to adding benefit. it absolutely was writtern very properly and valuable. I found out this book from my i and dad advised this ebook to find out.

(Amanda Larkin)

GREEN POLYMER CHEMISTRY: BIOBASED MATERIALS AND BIOCATALYSIS (HARDBACK)

To get **Green Polymer Chemistry: Biobased Materials and Biocatalysis (Hardback)** PDF, make sure you click the button under and download the document or gain access to other information which are in conjunction with GREEN POLYMER CHEMISTRY: BIOBASED MATERIALS AND BIOCATALYSIS (HARDBACK) ebook.

Oxford University Press Inc, United States, 2016. Hardback. Book Condition: New. 231 x 161 mm. Language: English . Brand New Book. Green chemistry is the design of chemical products and processes that reduce or eliminate the use or generation of hazardous substances. Green polymer chemistry is an extension of green chemistry to polymer science and engineering. Developments in this area have been stimulated by health and environmental concerns, interest in sustainability, desire to decrease the dependence on petroleum, and opportunities to design and produce green products and processes. Major advances include new uses of biobased feedstock, green reactions, green processing methodologies, and green polymeric products. A current feature of green polymer chemistry is that it is both global and multidisciplinary. Thus, publications in this field are spread out over different journals in different countries. Moreover, a successful research effort may involve collaborations of people in various disciplines, such as organic chemistry, polymer chemistry, material science, chemical engineering, biochemistry, molecular biology, microbiology, enzymology, toxicology, environmental science, and analytical chemistry. This book combines the major interdisciplinary research in this field and is targeted for scientists, engineers, and students, who are involved or interested in green polymer chemistry. These may include chemists, biochemists, material scientists, chemical engineers, microbiologists, molecular biologists, enzymologists, toxicologists, environmental scientists, and analytical chemists. It can be a textbook for a course on green chemistry and also a reference book for people who need information on specific topics involving biocatalysis and biobased materials.
