

## Memory Volume 3; A Contribution to Experimental Psychology

By Hermann Ebbinghaus

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1913 Excerpt: .unknown. For this I possess a fairly correct numerical value from the time of the tests in question: any six 16-syllable series was learned, as an average of 53 tests, in 1,270 seconds, with the small probable error 7. If all the mean values are brought together in relation to this last value, the following table results: The simple relation approximately realised in these numbers is evident: the number of repetitions used to impress the series (Column I) and the saving in work in learning the series 24 hours later as a result of such impression (Col. III) increase in the same fashion. Division of the amount of work saved by the corresponding number of repetitions gives as a quotient a practically constant value (Col. IV). Consequently the results of the test may be summarised and formulated as follows: When nonsense series of 16 syllables each were...
