

Solución láser para un problema espinoso

By Flores, Teresa / Ponce, Luis

Condition: New. Publisher/Verlag: Editorial Académica Española | La ablación láser como método para remover las espinas del fruto de Tuna | El nopal y su fruto, la tuna, son alimentos que se han utilizado en México desde tiempos inmemoriales debido a sus generosas propiedades. Su resistencia a entornos adversos, así como sus cualidades nutricionales y organolépticas, los convierten en alternativas de interés para el consumo humano a escala global. Sin embargo, la eliminación eficiente de las espinas, constituye hasta hoy un problema a resolver. Hoy día, se lleva a cabo de forma manual, mediante un proceso que acarrea pérdidas de volumen útil y afecta la duración del producto. El libro describe una técnica nueva y original, que permitirá resolver este problema de manera eficiente. Basado en la aplicación de pulsos láser, este método permite remover las espinas de manera selectiva, preservando la calidad del producto, sin merma de su volumen útil y obteniendo una duración que permite la comercialización en gran escala. Las ventajas que muestra la tecnología láser y que se describen en el libro, probablemente permitirán que en el futuro se pueda aplicar al procesado de diversos alimentos. | Format: Paperback | Language/Sprache: spa | 132 pp.
