Createspace Independent Publishing Platform, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.Think small to be inspired greatly with this delightful synergy of art, literature and science. Discover the world of tiny creatures to ignite a butterfly effect, inspiriting children about science without them even noticing. Motivate them to learn science respecting the living world to cast light on nature s secrets toward human advancement. There s a lot to learn from insects: community organization, responsibility for kins, and creative ways to communicate. Reading this book, the children become mature brothers and sisters with Cute and Cuter, two caterpillars that argue all day and all night. In the mean-time the kids are inspired with the cycle of life of the butterflies. They discover all the tasks of the hive with Honey, the bee that can t wait to become a forager wandering the fields, and they make friends with being a child - there s time to grow and there s time to glow. Share interesting facts about the rainbow with the kids. What color of the spectrum is visible to the bee, but not to us people? Enlighten the children about the primary colors of light. Are red, green and blue the primary colors? Where did yellow go? Invite students to imagine and draw the rainbow as the butterfly sees it, and to set on a journey with an ant friend preparing for winter. Together you ll fall in love with the magic little souls can light up. The young readers become coauthors and co-illustrators in this glorious series celebrating their creativity. Inspired by the poems, paintings and interesting facts about nature, they write and draw their own ideas. They create one-of-a-kind books, reflecting their child genius. In the mean-time they bond with...
