An Attempt Towards a Chemical Conception of the Ether (Classic Reprint) (Paperback)

By Dmitry Mendeleeff

Forgotten Books, United States, 2015. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from An Attempt Towards a Chemical Conception of the Ether In his Dictionnaire Complet, P. Larousse defines the ether as an imponderable elastic fluid, filling space and forming the source of light, heat, electricity, etc. This is laconic, but sufficient to raise some misgivings in the mind of a thoughtful man of science. He is obliged to admit, in the ether, the properties of a substance (fluid), while at the same time, in order to explain in some way the transmission of energy through space by its motion, the ether is assumed to be an all-pervading medium. Moreover, in order to explain the phenomena of light, electricity, and even gravity, this medium is supposed to undergo various disturbances (perturbations) and changes in its structure (deformation), like those observed in solids, liquids, and gases. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work.
