Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Decoration of Metal, Wood, Glass, Etc: A Book for Manufacturers, Mechanics, Painters, Decorators, and All Workmen in the Fancy Trades Literally, the word bronzing means a brown color being derived from the Italian word bronzino, which signifies burnt brown ; the term now, however, is taken as meaning the coloring of metals, wood, leather, etc., with a bronzing powder, no matter what the color of that powder may be. Bronze powders are usually dusted on a surface that has been coated with some suitable agglutinant to cause the powder to adhere, in some cases a bronze paint is used, while, in the case of leather articles, a liquid or bronzing fluid is employed. Such a fluid is one of the easiest methods of bronzing because the fluid is similar to a quick-drying varnish, that, when dry, exhibits a bronzed effect, which is generally due to the presence of a superabundance of an aniline dye. Success in the art of bronzing greatly depends on circumstances, such as the temperature of the alloy (metallic bronzing powder) or of the solution, the proportions of the metals used in forming the powder, and the quality of the materials. The moment at which to withdraw the goods, the drying of them and many other little items, require a care and attention in manipulation which experience alone can impart.
