## Science Ink: Tattoos of the Science Obsessed

By Zimmer, Carl, Roach, Mary, Foreword by.

Sterling. 1 Paperback(s), 2011. soft. Book Condition: New. Body art meets popular science in this book by the author of *Parasite Rex* and *Microcosm*. From an abstract depiction of galaxy M82 to a butterfly shape composed of Darwin's finches, from rainbow strands of DNA to illustrations of the Golden Ratio and its associated spiral, science writer Carl Zimmer presents photos of hundreds of vividly inked, surprisingly artistic tattoos that pay tribute to scientific endeavors, discoveries, and concepts. The tattoos also provide leaping-off points for Zimmer to reflect on the science in question, whether it's the symbolism of Darwin as a blind watchmaker or the significance of the uranium atom inked into the chest of a young radiologist. "Reveals the great ideas and deep passion for science in some of the most creative body art on the planet today." Neil Shubin "Every page of this book is a delight. Be dazzled by the images, wowed by the formulas, and inspired by the stories behind them all." Sean Carroll 271.

### Reviews

*This pdf will be worth buying. Better than never, though i am quite late in start reading this one. I am easily can get a enjoyment of reading through a published book.*

-- **Paul Ankunding**

*Absolutely essential study publication. It usually fails to expense an excessive amount of. Your lifestyle period will probably be transform when you full looking at this publication.*
