REMOVAL OF NITROGEN AND PHOSPHORUS FROM MUNICIPAL WASTEWATER USING MICROALGAE IMMOBILIZED ON TWIN-LAYER SYSTEM

Cuvillier Verlag Dez 2010, 2010. Taschenbuch. Condition: Neu. Neuware - Excessive nitrogen and phosphorus loading from municipal wastewater treatment plants is an ongoing threat to water quality, which leads to more stringent environmental regulations in different countries. Microalgal mediated twin-layer system offers an interesting alternative for nitrogen and phosphorus removal since it provides a treatment to remove both nutrients efficiently coupled with the production of potentially valuable biomass. In the twin-layer system, microalgae are immobilized by self-adhesion on a wet,...

Reviews

It is simple in study easier to comprehend. It is one of the most awesome ebook i have read through. You wont truly feel monotony at at any moment of your respective time (that's what catalogs are for concerning in the event you question me).

-- **Clint Sporer**

Without doubt, this is actually the best job by any publisher. It is writter in basic phrases instead of difficult to understand. You will like the way the author publish this publication.
