

Improving Business Strategy and Construction Management in Developing Countries (Paperback)

By Baishampayan (Baisham) Chatterjee

iUniverse, United States, 2013. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. This book develops new ideas and concepts for developing construction engineering and structural engineering in developing countries including whole of Eastern Europe, South America, Asia Pacific, parts of Africa, South East Asia and the Middle East. This book can be kept for future applications on piling, foundations, ground control and other complexities and development that are moving from developed to developing countries and if all the engineering facts and ideas are properly understood and applied, they would create exemplary outputs in developing countries. The developing countries mainly depend on old fashioned ideas on highway construction, bridge erection and few performance management and business strategy measures, which can be made far more superior and more convenient from this book. Many instances of soil nailing, techniques of different instruments have been used in this book which together brings out all the recent aspects of innovation.
