

Higher Algebra (Classic Reprint)

By Herbert E. Hawkes

Forgotten Books. Paperback. Condition: New. This item is printed on demand. 236 pages. Dimensions: 9.0in. x 6.0in. x 0.5in. The following computer-generated description may contain errors and does not represent the quality of the book. This text is prepared to meet the needs of the student who will continue his mathematics as far as the calculus, and is written in the spirit of applied mathematics. This does not imply that algebra for the engineer is a different subject from algebra for the college man or for the secondary student who is prepared to take such a course. In fact, the topics Avhich the engineer must emphasize, such as numerical com)utations, checks, graphical methods, use of tables, and the solution of specific problems, are among the most vital features of the subject for any student. But important as these topics are, they do not comprise the substance of algebra, which enables it to serve as part of the foundation for future work. Rather they furnish an atmosphere in which that foundation may be well and intelligently laid. The concise review contained in the first chapter covers the topics which have direct bearing on the work which follows. No attempt is made to...
