

Generalized Cesaro Operators and Integral Transforms on Function Spaces

By Naik, Sunanda

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | In this book an attempt has been made to study the boundedness properties of generalized Cesaro operators on different function spaces. Also two parameter family of close-to-convex functions are generated by using coefficient conditions and univalence of certain weighted integral transforms are obtained. As a consequence, conditions on the parameters are obtained for hypergeometric functions to be univalent. Based on the Borel transform and Hadamard multiplication theorem, interesting results on the growth of entire functions defined by convolution are obtained. In particular, certain results related to confluent hypergeometric functions are obtained using Steiltjes transform. | Format: Paperback | Language/Sprache: english | 100 pp.
