If great care is used in expressing the right hand figure of each partial product, but one more place than the number wanted in the complete product is needed. Example 2. Find the quotient of 26.843 divided by 3.1416, to the second decimal place. Abridged Work. Complete Work. 8.54 8.54 3.14,10)26.843 3.1416)26.8430 25.13 25.1328 1 71 1 71020 1 57 1 57080 14 139400 13 125664 13736 Explanation. Multiplying a dividend by a number has the same effect upon the quotient as dividing the divisor by that number. Also, to bring down a figure is equivalent to multiplying the remainder by 10 and adding that number, and to cut off a figure from the divisor is equivalent to subtracting that number and dividing by 10. Then, evidently one may cut off a figure from...

Reviews

Undoubtedly, this is actually the greatest job by any author. This can be for those who statte there was not a worthy of studying. I am delighted to inform you that this is actually the greatest publication i actually have read within my very own daily life and could be he greatest book for ever.
-- Perry Reinger

The ebook is fantastic and great. It really is basic but unexpected situations within the fifty percent in the book. Its been written in an exceptionally basic way in fact it is only after i finished reading through this ebook by which actually modified me, modify the way in my opinion.
-- Ms. Donna Parker MD
