Aviation Supplies Academics Inc, United States, 2016. Paperback. Condition: New. Language: English . Brand New Book. This ACS book from the FAA lists the standards and requirements for the Remote Pilot Certificate, issued for operating drones and small unmanned aircraft systems in the National Airspace System. The new Airman Certification Standards are ideal for checkride preparation, and will help applicants develop an understanding of how knowledge, risk management, and skill elements work together for safe performance of each required task they may be asked to perform during the checkride. For instructors, the ACS will serve as a guide for teaching and training an applicant everything they need to know for certification and safe operation within the National Airspace System. Designated Pilot Examiners (DPEs) will use the ACS to assess an applicant s understanding, knowledge, risk management considerations, and performance of each task. As always, ASA delivers authentic, accurate, and reliable FAA documents exactly as provided by the FAA. One noticeable change is that the FAA has adapted the size and format of the ACS so that it lists everything an applicant needs to know, consider, and do in order to pass both the knowledge test and the practical test for a certificate or rating.
