

Mazzaroth and the Birth of a Nation

By Harry Golemon

Clovercroft Publishing, United States, 2016. Paperback. Book Condition: New. 213 x 137 mm. Language: English . Brand New Book. Mazzaroth, an ancient Hebrew word, uttered by God, is found in the Bible. The definition, lost over time, leads to the discovery and use of astronomy in the Bible and a relationship with the birth of the nation of Israel. Further application allows one to reconstruct the original Hebrew calendar given to Moses, showing how Jesus last days and His future and glorious return fulfills the message of the calendar. A merger of Jewish biblical history and modern science, several biblical principles of astronomy, historically accredited centuries after the scriptures were first penned, are unlocked, leading to significant observations in the night sky. Will you be able to take the given clues in the Bible to assign the constellations to the tribes of Israel as they encamped around the tabernacle? Can the footprints of God s hand in history be seen in the night time scene, proving God knew the end from the beginning? Is time running out for the Christian era?.
